

# Portable Generator Carbon Monoxide (CO) Facts

**ANSI/UL 2201 PROVIDES TWO CRITICAL FORMS OF PROTECTION FROM CO POISONING AT APPROPRIATELY SAFE LEVELS.**

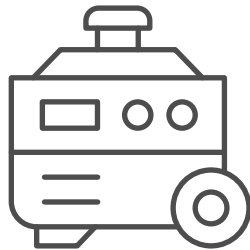

## ANSI/UL 2201 TWO-TIER CO STRATEGY

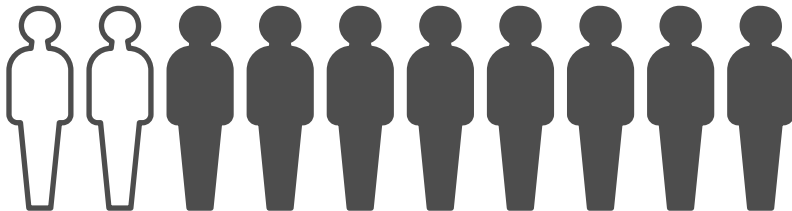

ANSI/UL 2201 addresses performance requirements to mitigate CO poisoning, has shutoff technology for additional protection and contains a comprehensive, carefully developed two-tier strategy

**780 out of 965**

non-fire CO deaths were caused by portable generators in 2005-2016

That's about **8 out of 10**

OR, an average of **71 deaths per year** from portable generators between 2005-2016

Every year, people die in incidents related to portable generator use. Most of the incidents associated with portable generators reported to CPSC involve CO poisoning from generators used indoors or in partially-enclosed spaces.

Visit [www.cpsc.gov](http://www.cpsc.gov) for carbon monoxide safety tips.

**1**

**Significant Reductions in CO emission**

**2**

**Shutoff technology for additional protection at 400ppm**
