UL is a testing organization (TO) and certification organization (CO) accredited by the Standard Council of Canada (SCC) since 1992 to test and certify products for distribution in Canada. The cUL Mark is recognized and readily accepted by manufacturers, retailers, distributors and authorities having jurisdiction (AHJs) in all territories of Canada, including the federal government. Please refer to <https://www.scc.ca/> for more details.

Brand owners, retailers and product manufacturers who obtain the cUL or cUL Recognized Component certification for their product(s) will benefit from competitive pricing for the full service scope, including new work, follow-up inspection services (FUS), label services, and annual maintenance.

Products with the cUL certification are automatically protected under UL's valuable Anti-Counterfeiting Program, with an experienced team of law enforcement professionals dedicated to working with global customs agencies and law enforcement authorities to combat counterfeiting activities. This helps ensure a fair and competitive marketplace for customers, and the delivery of safe products to consumers.

Program Benefits

- Competitive pricing for full service scope, including new work, follow-up inspection services (FUS), label services, and annual maintenance
- Global brand protection under UL's Anti-Counterfeiting Program
- Backed by UL thought leadership, some compliance requirements under the new CSA standard were pioneered by UL 588
- Seamless support from experienced engineers and technical experts locally, as well as in your target market(s)
- Comprehensive follow-up (FUS) and market surveillance program help ensure a compliant supply chain and fair, competitive market
- Reduce time and cost by integrating with other global testing and certification requirements under UL's one-stop solution service for both end-products and components

Please reach out to your UL representative via [UL.com/contactwc](https://www.ul.com/contactwc) for additional information about these service offerings.
